# Executive Account Breach Summary

Having credentials exposed can have far reaching effects, such as data breaches, loss of brand reputation, as well as financial losses. By processing unknown and well known breach datasets leaked on Darknet marketplaces, the platform has identified the credentials of your employees including your C-level executives and customers. To mitigate possible threats, we recommend you to reset/disable these accounts and apply 2FA mechanisms.

# The SOCRadar Advantage

**Consolidated architecture for operational efficiency and unmatched ROI.**

SOCRadar combines attack surface management, digital risk protection, and threat intelligence capabilities to protect your entire business against sophisticated multi-vector cyber attacks.

**ThreatFusion**  
Cyber Threat Intelligence

**RiskPrime**  
Digital Risk Protection

**AttackMapper**  
Attack Surface Management

## Power of automation

Skyrocket security team efficiency by reducing mundane tasks.

## 360° visibility

Gain in-depth visibility into your external-facing digital assets.

## Precise API integration

Smooth integration with existing security stack and SIEM solutions.

## Immediate start

Hitting the ground in hours, discovering, monitoring and alerting without requiring any input.

## Optimized costs

Choose from the discovered assets only you want to monitor to reconcile license costs with real needs.

## CTIA support

Ready to work with clients to identify and remediate threats, helping them build in-house skills and expertise.

Trusted by world's leading organizations
