SOCRadar delivers intelligent digital risk protection platform against sophisticated cyber attacks for organizations of any size. Its portfolio of digital assets and perimeter monitoring platforms hardened with targeted threat intelligence – all automated and supported by a global team of qualified intelligence analysts – provides unparalleled visibility, management, and protection of digital risks. Prioritized, up-to-date, and relevant cyber threat insights empower customers to take action starting from the reconnaissance stage of the cyberattack life cycle.

Automation Powered Cyber Threat Intelligence

The External Threat Intelligence Snapshot Report summarizes the public facing digital presence and sensitive data exposure of and its business ecosystem. The data used for this analysis has been collected by scanning a wide variety of sources across Surface, Deep and Dark Web using OSINT methodologies. Starting with company domain name, SOCRadar created a baseline of your organization's external attack surface in hours - without requiring any excel keyword lists or specific software installation. This report provides a snapshot of organization's attack surface with actionable intelligence including compromised employee credentials, possible lookalike domains, unknown data leakages and critical vulnerabilities on your public-facing infrastructure.
